

SPILL RESPONSE MADE SIMPLE

Powerful sorbents and spill kits keep workspaces safe and compliant

Spills happen. With the right products, containment and cleanup can be prompt and simple to prevent spreading, minimize slip-and-fall risks, and get everyone back to work safely. Sellars offers a range of sorbent products and spill kits, which are crucial for automotive, manufacturing, gas & oil, and medical industries to always have on hand.

A more sustainable sorbent

Our proprietary Q-Cel sorbent line is made using our internal DRC paper waste. This process creates a more sustainable, lower cost, and higher performance sorbent compared to the competing meltblown products. These universal sorbents are also twice as absorbent, more consistent, and higher quality.

Q-CEL SORBENTS ARE
40-100%
MORE ABSORBENT
THAN COMPETITORS

COMPARISON GUIDE

Compare our sorbent products to identify which is the most effective for different needs and applications. See how absorbency and durability differ for each sorbent product using the helpful chart below.

DURASOAK® UNIVERSAL PADS & ROLLS

Patented Q-Cel DuraSoak® products are available in light, medium, and heavy-duty pads, rolls, and split rolls. Made with 60% recycled materials, DuraSoak offers great price stability as well as 2X the absorbency of leading competitors. Its outer layer is made with meltblown-spunbond coverstock for added strength, durability, traction, and extraordinary absorbency. Absorbs both oil and water as well as other fluids.

DURASOAK SERIES: WEIGHT FOR WEIGHT, THERE'S NO COMPARISON

Absorbs More With Less Pads

It takes just 4.5 DuraSoak Light-Duty Pads to absorb 1 gallon of motor oil vs 9 of the competitor's light-weight pads.*

More Absorbent Per Dollar Spent

DuraSoak absorbs .98 gallons of motor oil vs the competitor's .41 gallons per every \$1 spent.*

Made With More Recycled Material

DuraSoak Absorbents contain 60% or more recycled fibers, while competitor pads only contain 25% or more.

Our Light-Duty Outperforms Their Heavy-Weight

DuraSoak Light-Duty Absorbs .22 gallons of oil per pad. The competitor's Heavy-Weight only absorbs .18 gallons per pad.

Class A Fire Retardant When Dry

Lab tested per ASTM E84

*Results came from an independent lab, SGS Integrated Paper Services.

EVERSOAK® UNIVERSAL PADS & ROLLS

Original patented Q-Cel EverSoak® Sorbents are made with a 70% recycled fiber core in between single or double-sided spunbond coverstock for exceptional absorption. Available in light, medium, and heavy-duty, EverSoak pads, rolls, and split rolls can tackle drips, spills, and leaks of water, oil, and other fluids like grease, coolants, diesel, and transmission fluid.

MELTBLOWN UNIVERSAL PADS & ROLLS

Universal Meltblown sorbents are designed and manufactured to soak up oil, water, and most chemicals. Use versatile pads for small MRO and environmental spills or rolls/split rolls for safe walkways or around known leaks in machines. Universal Meltblown products are made from 100% “blown” polypropylene and have a smooth, tight finish, strong tensile strength, and good absorbing capabilities.

MELTBLOWN OIL-ONLY PADS & ROLLS

Soak up oil and hydrocarbon fluids while repelling water-based liquids with Meltblown Oil-Only Sorbents. Oil-only sorbents are white in color, available in light, medium, and heavy-duty, and float so they can be used to soak up oil spills in water. The 100% polypropylene pads and rolls resemble a soft tissue paper.

MELTBLOWN HAZMAT PADS & ROLLS

Meltblown Hazmat products soak up even the most aggressive drips, spills, and leaks including toxic chemicals, battery acid, acetone, and xylene, as well as oil and water-based liquids. The yellow color communicates its intended use even across language barriers while ensuring proper safety handling and regulatory compliance. Made with 100% polypropylene.

SOCKS, BOOMS, BARREL-TOP PADS

Sorbents come in various forms to accommodate and contain different spill types. Socks are a moldable sorbent to corral spills and prevent spreading. Booms are a much larger sock that floats on the water to contain large spills and can be attached end-to-end using a built-in steel clamp. Barrel-top pads perfectly fit atop a standard 55-gallon drum, preventing leaks from reaching the floor.
